

# Frames dataset

- It's annotated with the following:
  - Dialogue acts, slot types, slot values, and references to other frames for each utterance.
  - The ID of the currently active frame.
- Examples:

<code>inform(category=2.5)</code>
-----------------------------------

2.5 stars will do
-------------------

<code>offer(ref=[6], seat=business, price=1002.27)</code>
---

What about a \$1002.27 business class ticket to San Francisco?
