1D convolutions

- Can be extended to 3-grams, 4-grams, etc.
- One filter is not enough, need to track many n-grams
- They are called 1D because we slide the window only in one direction

cat		**0.7**	**0.4**	**0.5**
sitting		**0.2**	**-0.1**	**0.1**
there		**-0.5**	**0.4**	**0.1**
or		**-0.1**	**0.8**	**-0.3**
here		**-0.5**	**0.3**	**0.2**
